

# Business Productivity Software Market Size, Share And Growth Analysis For 2024-2033

*The Business Research Company's Business Productivity Software Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033*

LANDON, GREATER LONDON, UK, July 18, 2024 /EINPresswire.com/ -- The [global business productivity software market](#) is projected to grow from \$40.98 billion in 2023 to \$46.62 billion in 2024, at a CAGR of 13.8%. This rapid

growth is attributed to factors such as the automation of routine tasks, the personal computing revolution, internet proliferation, integration capabilities, and mobile computing. The market is anticipated to reach \$78.57 billion by 2028 at a CAGR of 13.9%, driven by advancements in cloud computing, AI, globalization, and remote work models.

It will grow from \$40.98 billion in 2023 to \$46.62 billion in 2024 at a compound annual growth rate (CAGR) of 13.8%.”

Rise of Remote and Distributed Workforces Drives Market Growth

The rise of remote and distributed workforces globally is a significant factor contributing to the growth of the business productivity software market. Remote and distributed workforces refer to employment structures where employees work outside of a traditional office setting, often from their homes or other remote locations.

This trend is increasing due to advancements in technology, changing attitudes towards work-life balance, and the global pandemic accelerating the adoption of flexible work arrangements. Business productivity software supports these workforces by providing the necessary tools and platforms for efficient communication, collaboration, project management, and task organization. For instance, in April 2023, the US Bureau of Labor Statistics reported that the percentage of establishments with employees who teleworked grew from 37.4% in 2021 to 42.2% in 2022. Therefore, the rise of remote and distributed workforces globally is driving the growth of the business productivity software market.
