Behavioral Health Software Global Market Report 2024: Market Size, Trends, And Global Forecast 2024-2033

annual growth rate (CAGR) of 23.0%. The growth during this period can be attributed to improvements in time efficiency, cost savings, the high prevalence of depression, increased use of business intelligence, and increased stress. The market is expected to continue its exponential growth, reaching $8.86 billion by 2028, at a CAGR of 23.1%. This growth is driven by government funding, high demand for mental health services, government initiatives for EHR adoption, favorable behavioral health reforms, and an increasing number of behavioral health issues.

Increasing Prevalence of Mental Health Disorders Drives Market Growth
The increasing prevalence of mental health disorders is expected to propel [the growth of the behavioral health software market](#). Mental health disorders, encompassing

conditions affecting mood, thinking, and behavior, are rising due to factors such as stressful lifestyles, traumatic childhood experiences, and social media pressures. Behavioral health software improves patient care by enhancing engagement, streamlining administrative tasks, and providing data-driven insights. For instance, the National Alliance On Mental Illness reported nearly 600,000 hospitalizations each year among people aged 18-44 in the U.S. due to psychosis spectrum and mood disorders. Furthermore, the National Health Service in the UK noted an increase in mental disorder prevalence among individuals aged 17 to 19, from 17.4% in 2021 to 25.7% in 2022. Therefore, the rising prevalence of mental health disorders drives the behavioral health software market.
