

FlyFin Offers Custom Tax Report for Maximizing Business Tax Savings

FlyFin, the #1 AI & CPA tax preparation and filing service, announced the launch of its Custom Tax Report, designed for business owners.

SAN JOSE, CALIFORNIA, UNITED STATES, July 18, 2024

/EINPresswire.com/ -- [FlyFin](#), the #1 AI and CPA tax preparation and filing service, announced the launch of its Custom Tax Report, designed specifically for business owners. The personalized report breaks down the tax liability and highlights every tax-saving opportunity.

Small business owners reportedly spend over 2 billion hours preparing their tax returns. If they are filing business taxes for an LLC for the first time, this involves finding deductions, researching LLC tax laws, knowing how to file business taxes for an LLC, comparing S Corp vs LLC and calculating owed taxes.

The free tax report, available on the app, minimizes human effort by accurately calculating federal, self-employed and local tax liability along with identifying substantial saving opportunities. This includes state-specific tax breakdowns using built-in tools like the [California tax calculator](#).

Users get access to personalized tax reduction strategies, as the report considers each taxpayer's unique situation, profession and hundreds of other variables. It goes beyond generic advice, offering specific recommendations based on the latest tax laws and individual circumstances.

Understanding how to file taxes for an LLC also involves taking advantage of business deductions. FlyFin's AI automatically identifies potential [1099](#) deductions. The more deductions the AI finds, the lower the tax bill.
