North America was the largest region in the open source services market in 2023.

Open Source Services Market Definition

Open-source services refer to software for which the source code is made freely available and may be redistributed and modified according to the requirement of the user. OSS typically includes a license that allows programmers to modify the software to best fit the needs and control how the software can be distributed. Open-source code is shared publicly. Anyone can access the repository to use the code independently or contribute to the improvements of the design and functionality of the project.

Open Source Services Global Market Report 2024 from [The Business Research Company](#) covers the following information:
