

Sound Payments and Equinox Announce Completion of Quantum Cloud Integration

Equinox Devices Expands Options for Quantum Cloud Resellers

JACKSONVILLE, FL, US, July 23, 2024 /EINPresswire.com/ -- Sound Payments, a processor-agnostic POS and payments software provider, and Equinox Payments announced today the completion of integration for Sound's Quantum Cloud solution and the Luxe 8500i and Luxe 6200m payment devices from Equinox.

"This marks an important milestone in our company's history as we welcome our second hardware partner," said Andrew Russell, CEO of Sound Payments. "We are proud to introduce the versatile Equinox payment devices to our resellers and merchants."

Quantum Now on Equinox Devices

The Luxe 8500i semi-integrated payment terminal combines an elegant design with a smart and secure architecture. The top face-mounted card readers optimize the overall footprint and eliminate the clutter associated with traditional mounting stands.

“

This marks an important milestone in our company's history as we welcome our second hardware partner.”

Andrew Russell, CEO of Sound Payments

“It's great to be a part of Sound Payment's cloud-connected payment solution,” said Rob Hayhow, VP of North America at Equinox. “The plug-and-play integration with our Luxe terminals and Voyager payment app with Quantum Cloud allows resellers to quickly offer merchants an improved customer experience.”

The Luxe 6200m modular terminal goes wherever customers are — at the checkout, by the curb, at tables,

and on the road. Merchants can choose a wired or wireless base device with or without a built-in printer. Both devices protect sensitive card data through a combination of PCI 6.x and point-to-point encryption to a choice of payment processors.

The devices and Quantum solution will be showcased at RSPA's RetailNOW at booth 208. To learn more, visit soundpayments.com or watch a [video](#) now.

Quantum Cloud empowers seamless connectivity between any POS system and semi-integrated payment devices through the Internet. The innovative architecture of Quantum Cloud eradicates common challenges faced by POS developers, such as IP addressing and firewall issues, when establishing connections to semi-integrated payment devices over the internet.

Resellers in the payments industry choose Sound Payment solutions for their ease of use, including the ability to transfer devices to a different merchant. Sound Payments offers a white label option, a lower price point, a processor-neutral approach, and a cloud-based platform that makes it easier for the POS and payment terminal to find each other when the internet returns in the event of an outage.

About Sound Payments

Sound Payments creates simplified, innovative solutions in the payments and petroleum industries. Sound POS is a cost-effective, all-in-one POS that gives greater flexibility and more tools for stores to run their business.
