

Award-Winning MINITEC Enclosures For Handheld And Wearable Electronics

OKW's award-winning range of MINITEC handheld and wearable electronic enclosures is now larger than ever.

BRIDGEVILLE, PENNSYLVANIA, USA, August 13, 2024 /EINPresswire.com/ -- [MINITEC - one of many OKW models to win an iF Product Design Award](#) - is ideal for emergency systems, monitoring and alarms, wireless remote control, mobile USB applications and IoT/IIoT.

Modern, flat styling makes these attractive, ergonomic housings easy to carry or wear. They comprise two shells separated by a choice of intermediate rings.

Award-winning MINITEC enclosures are designed for wearable 'personal' electronics

These rings enable MINITEC to be fitted to belts, wrist straps, lanyards, key rings or carried loose. Some rings feature slots for USB Type A or micro USB 5 P, B Type SMT connectors.

“

Our unique MINITEC enclosures are individually designed for wearable technology”

Sean Bailey

MINITEC's two different shapes (rounded D 'Drop' and rectangular E 'Edge'), three sizes, and dozens of colored intermediate rings create an impressive array of standard permutations - reducing the need for customization.

All Drop enclosures feature a recessed top for a membrane keypad or product label. Edge housings can be specified with or without this recess.

MINITEC is available in sizes S, M and L from 2.01" x 1.26" x 0.51" to 3.07" x 1.89" x 0.79"/0.95"/1.02". The top and bottom shells are molded from off-white (RAL 9002) or lava gray ABS (UL 94 HB). Black (RAL 9005) infrared-permeable PMMA (UL 94 HB) is also available for

remote control applications.

The intermediate rings are either soft-touch TPE/SEBS, ABS or PMMA. Standard colors include orange, green, blue, black, off-white, lava gray and volcano gray.

Accessories include carrying and wrist straps, a strap eyelet (size EL), lanyard, key ring and a USB end cover.

OKW can supply [MINITEC fully customized](#). Services include machining, lacquering, printing, laser marking, decor foils, special materials, RFI/EMI shielding and installation/assembly of accessories.
