

# Financial Services Industry Hit Hardest by Recent Microsoft Windows Outage According to the Study by ChatWithPDF

ALPHARETTA, GA, UNITED STATES, July 22, 2024 /EINPresswire.com/ -- The recent Microsoft Windows outage have caused major problems across various sectors, with the financial services industry being the most affected. [ChatWithPDF's latest study](#) looks into these disruptions and compares them to other major system failures over the past five years.

This analysis shows how vulnerable our systems are to software failures, providing key insights into this important issue.

## Key Insights:

Microsoft Windows outage and several past tech outages caused significant disruptions and major economic impacts. This emphasizes the need for preparedness and resilience in tech infrastructures."

- Financial Services: Windows outage caused major disruptions, downtime in transactions, and financial losses.

- Telecommunications, Aviation, and Social Media: Telecom companies like T-Mobile and Verizon were moderately affected. Some airlines faced disruptions, while social media platforms were least impacted due to Linux-based servers.

- Key System Failures (Past Five Years): Major incidents included the SolarWinds and Kaseya attacks, Colonial

Pipeline attack, Equifax and Marriott breaches, Facebook scandal, DNS and AWS outages, T-Mobile breach, and British Airways outage.

The graphic features a dark blue background with a white icon of three stylized human figures in orange and yellow. To the right of the icon is a list of bullet points in white text. Below the graphic is the title 'Windows Outage Study' in white text.

- **Financial Services** industry impacted the most while **Social Media** got impacted the least from Windows outage
- Some of the other recent significant impacts caused by system failure/cyberattack are below
- The Colonial Pipeline attack shut down 5,500 miles of pipeline, leading to a **\$4.4 million** ransom payment
- The Equifax breach exposed data of 147 million individuals, resulting in a **\$700 million** settlement
- The 2020 DNS outage impacted hundreds of websites, causing around **\$4.1 billion** in economic impact

Windows Outage Study

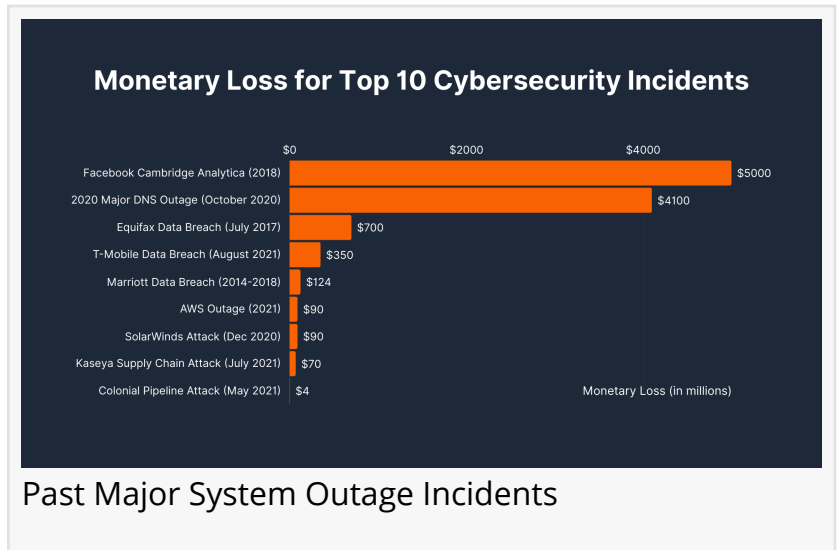

The Microsoft Windows Laptop Outage of 2024 highlights the vulnerability of critical infrastructure to software failures. Understanding these trends is crucial for developing robust testing measures and disaster recovery plans to mitigate future incidents.
