Growth Driver Of The Household Type Fans Market

The increasing global temperatures are expected to drive the household fan market. Temperature is a measure of the degree of hotness or coldness of a substance, typically expressed in degrees Fahrenheit (°F) or Celsius (°C). Household fans help cool indoor spaces by circulating air, dissipating heat from the body, and providing a cooling effect, thus contributing to

a more comfortable environment during hot weather. Their function is to enhance heat dissipation and create a cooling sensation.
