

# Polyfluoroalkyl Substances (PFAS) Waste Management Market Analysis With Opportunity Segments For 2024-2033

*The Business Research Company's Polyfluoroalkyl Substances (PFAS) Waste Management Global Market Report 2024 -Market Size, Trends, And Global Forecast 2024-2033*

LONDON, GREATER LONDON, UK, July 24, 2024 /EINPresswire.com/ -- The [polyfluoroalkyl substances \(PFAS\) waste management market](#) has

experienced robust growth in recent

years, expanding from \$1.73 billion in 2023 to \$1.83 billion in 2024 at a compound annual growth rate (CAGR) of 5.7%. The growth in the historic period can be attributed to increased demand for polyfluoroalkyl substances, increased demand from various industries, regulatory changes, shifting consumer preferences, and increased awareness of the environmental and health risks associated with PFAS contamination.

## Strong Future Growth Anticipated

The polyfluoroalkyl substances (PFAS) waste management market is projected to continue its strong growth, reaching \$2.29 billion in 2028 at a compound annual growth rate (CAGR) of 5.9%. The growth in the forecast period can be attributed to growing demand for environmental

sustainability, rising environmental population worldwide, privatization of environmental testing and treatment services, increased funding for wastewater and treatment projects, and high usage of perfluorooctanoic acid (PFOA).

Polyfluoroalkyl Substances (PFAS) Waste Management Global Market Report 2024 : Market Size, Trends, And Global Forecast 2024-2033

The growing government initiatives for environmental sustainability are expected to propel the growth of the polyfluoroalkyl substances (PFAS) waste management market going forward. Environmental sustainability involves managing natural resources responsibly to meet current needs without compromising future generations' ability to do the same. The rising government initiatives for environmental sustainability are due to public health protection, economic benefits, and biodiversity conservation. Government initiatives for environmental sustainability aim to create a more sustainable and resilient future for both the environment and society.

### Major Players And Market Trends

Key players in the polyfluoroalkyl substances (PFAS) waste management market include BASF SE, The Dow Chemical Company, Veolia Environnement S.A., 3M Company, Waste Management Inc., DuPont de Nemours Inc.

Major companies operating in the poly-fluoroalkyl substances (PFAS) waste management market are developing advanced solutions such as energy-efficient PFAS destruction technology to effectively mitigate environmental contamination and reduce the long-term health risks associated with these persistent chemicals. Energy-efficient PFAS destruction technology refers to methods and innovations aimed at breaking down PFAS compounds in an environmentally friendly and cost-effective manner while minimizing energy consumption.

### Segments:

- 1) By Type: Perfluorooctane Sulfonate (PFOS), Perfluorooctanoic Acid (PFOA), Perfluorabutanoic Acid (PFBA), Perfluorodecanoic Acid (PFDA)
- 2) By Method: Landfilling, Incineration, Water Waste Treatment
- 3) By Location: On-Site, Off-Site
- 4) By Application: Industrial, Construction, Municipal Solid Waste, Other Applications

### Geographical Insights: Asia-Pacific Leading The Market

Asia-Pacific was the largest region in the polyfluoroalkyl substances waste management market in 2023. The regions covered in the polyfluoroalkyl substances (PFAS) waste management market report are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East, Africa.

### Polyfluoroalkyl Substances (PFAS) Waste Management Market Definition

Polyfluoroalkyl substances (PFAS) waste management refers to the strategies, methods, and processes used to handle, treat, and dispose of waste materials containing PFAS compounds. PFAS are a group of artificial chemicals used in various industrial and consumer products for their water- and grease-resistant properties. The goal of PFAS waste management is to minimize the release of these substances into the environment, protect human health, and ensure compliance with regulatory requirements.

Polyfluoroalkyl Substances (PFAS) Waste Management Global Market Report 2024 from The Business Research Company covers the following information:

- Market size data for the forecast period: Historical and Future
- Market analysis by region: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.
- Market analysis by countries: Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

Trends, opportunities, strategies and so much more.

The Polyfluoroalkyl Substances (PFAS) Waste Management Global Market Report 2024 by The Business Research Company is the most comprehensive report that provides insights on polyfluoroalkyl substances (PFAS) waste management market size, polyfluoroalkyl substances (PFAS) waste management market drivers and trends, polyfluoroalkyl substances (PFAS) waste management market major players, polyfluoroalkyl substances (PFAS) waste management competitors' revenues, polyfluoroalkyl substances (PFAS) waste management market positioning, and polyfluoroalkyl substances (PFAS) waste management market growth across geographies. The polyfluoroalkyl substances (PFAS) waste management market report helps you gain in-depth insights into opportunities and strategies. Companies can leverage the data in the report and tap into segments with the highest growth potential.
