

Growing at a CAGR of 14.1% | The Biometric Technology Market Share Reach USD 127.32 Billion by 2030

Standardized security with the use of advanced technology, biometric solutions have witnessed increased usage in the market.

PORTLAND, PORTLAND, OR, UNITED STATE, July 24, 2024 /

EINPresswire.com/ -- According to the report published by Allied Market Research, Growing at a CAGR of 14.1% | The [Biometric Technology Market Share](#) Reach USD 127.32 Billion by 2030. The report provides an extensive analysis of changing market dynamics, major segments, value chain, competitive scenario, and regional landscape. This research offers valuable able guidance to leading players, investors, shareholders, and startups in devising strategies for sustainable growth and gaining a competitive edge in the market.

The global biometric technology market was valued at USD 34,950.35 million in 2020, and is projected to reach USD 1,27,322.12 million by 2030, growing at a CAGR of 14.1% from 2021 to 2030.

The global biometric technology market was valued at USD 34,950.35 million in 2020, and is projected to reach USD 1,27,322.12 million by 2030, growing at a CAGR of 14.1% from 2021 to 2030.

Increase in crime and privacy intrusion rate have raised concerns among people and organizations to secure their assets and personal details, which in turn, drives the global biometric technology market. Huge R&D activities and market competition have paved the way for lucrative opportunities in the industry.

The biometric technology market is segmented on the basis of component, type, end user, and region. On the basis of component, it is segmented into hardware and software. By type, it is segmented into physiological biometrics and behavioral biometrics. The physiological biometrics

segment is further sub segmented into face recognition, iris recognition, fingerprint recognition, hand geometry, and others. The behavioral biometrics segment is further divided into signature recognition, voice recognition, and others. By end user, it is bifurcated into public sector, BFSI, healthcare, it & telecommunication, and others. By region, it is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

Covid-19 Scenario

□ Most of the biometric devices such as finger print scanners, vein recognition, and others involve touching of surfaces and thus, there was a steep decline in demand for these maneuvers from several verticals, especially during the initial phase.

□ Also, the majority of government bodies suspended the use of biometric attendance for all its employees, as a precautionary measure to check the spread of coronavirus.

□ However, other biometric devices such as iris scanner, face recognition, and others have experienced higher demand as they involve zero point of contact and provide correct authentication results.

Inquiry Before Buying: <https://www.alliedmarketresearch.com/purchase-enquiry/237>

Based on component, the hardware segment held the major share in 2020, generating nearly two-thirds half of the global biometric technology market. This is owing to the fact that these hardware scans are matched against the saved database to approve or deny access to the respective system. The software segment, however, is projected to cite the fastest CAGR of 15.4% during the forecast period. This is due to the fact that it allows different application software on different operating systems to be compatible.

Based on type, the physiological biometric segment held the highest share in 2020, generating around three-fourths of the global biometric technology industry. The fact that it is considered as highly reliable, as people's characteristics are unique and cannot be compromised by influence of psycho emotional phase drives the segment growth. The behavioral biometric segment, on the other hand, would cite the fastest CAGR of 16.8% from 2021 to 2030. This is because it is based on the unique and measurable patterns of human activities such as voice, keystroke, handwriting, middleware, signature, and odor for identification or authentication.

Based on region, the market across North America accounted for the major share in 2020, contributing to more than two-thirds of the global biometric technology industry. This is attributed to the growing use of web applications and the Internet has escalated the demand for security and verification on account of the increased threat of cyber-attacks and data pilfering.

Asia-Pacific, simultaneously, is expected to cite the fastest CAGR of 17.3% throughout the forecast period. Increasing use of the Internet, online payments, immigration and initiatives such as "Digital India" and "Adhar" by the Indian government are likely to expand the biometric market growth at the fastest rate in the region.

The key players profiled in the biometric technology market analysis are 3M Company (Congent Systems, Inc.), Fujitsu Frontech Limited, Imaware Systems, Inc., Suprema, Inc., Safran S.A. (IDEMIA), secunet Security Networks AG, Thales S.A., BIO-key International, NEC Corporation and Precise Biometrics.

Thanks for reading this article you can also get individual chapter-wise sections or region-wise report versions like North America Europe or Asia.

If you have any special requirements, please let us know and we will offer you the report as per your requirements.

Lastly this report provides market intelligence most comprehensively. The report structure has been kept such that it offers maximum business value. It provides critical insights into the market dynamics and will enable strategic decision-making for the existing market players as well as those willing to enter the market.

About Us:

Allied Market Research (AMR) is a market research and business-consulting firm of Allied Analytics LLP, based in Portland, Oregon. AMR offers market research reports, business solutions, consulting services, and insights on markets across 11 industry verticals. Adopting extensive research methodologies, AMR is instrumental in helping its clients to make strategic business decisions and achieve sustainable growth in their market domains. We are equipped with skilled analysts and experts and have a wide experience of working with many Fortune 500 companies and small & medium enterprises.

Pawan Kumar, the CEO of Allied Market Research, is leading the organization toward providing high-quality data and insights. We are in professional corporate relations with various companies. This helps us dig out market data that helps us generate accurate research data tables and confirm utmost accuracy in our market forecasting. Every data company in the domain is concerned. Our secondary data procurement methodology includes deep presented in the reports published by us is extracted through primary interviews with top officials from leading online and offline research and discussion with knowledgeable professionals and analysts in the industry.
