

Global Cell Cryopreservation Market Overview And Statistics For 2024-2033

The Business Research Company's Cell Cryopreservation Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033

LANDON, GREATER LANDON, UK, July 26, 2024 /EINPresswire.com/ -- The cell cryopreservation market has experienced robust growth in recent years, expanding from \$10.21 billion in

2023 to \$12.65 billion in 2024 at a compound annual growth rate (CAGR) of 23.8%. The growth in the historic period can be attributed to increasing demand for cell-based therapies, rise in biomedical research, growing need for organ transplantation, rise in R&D activities for cell based therapies and increasing use of cryopreserved cell.

٢

It will grow to \$29.9 billion in 2028 at a compound annual growth rate (CAGR) of 24%." The Business Research Company Strong Future Growth Anticipated

The cell cryopreservation market is projected to continue its strong growth, reaching \$29.9 billion in 2028 at a compound annual growth rate (CAGR) of 24%. The growth in the forecast period can be attributed to rising demand for in vitro fertilization (IVF) procedures, advancement in

organ transplantation procedures, expansion of biobanking activities, rising incidence of chronic diseases and positive government initiatives and funding.

Growth Driver Of The Cell Cryopreservation Market

The increasing number of organ transplantation procedures is expected to propel the growth of the cell cryopreservation market going forward. Organ transplantation is a medical procedure where a damaged or failing organ is replaced with a healthy organ from a donor. Organ transplant procedures are increasing due to organ failure caused by hereditary abnormalities, infections, traumas, and chronic diseases. Cell cryopreservation in organ transplantation involves freezing and storing cells from organs to preserve their viability for future use, enhancing graft success, and reducing immune rejection.

Major Players And Market Trends

Key players in the cell cryopreservation market include Thermo Fisher Scientific Inc., Danaher Corporation, Merck KGaA, Corning Inc., STEMCELL Technologies, Cryoport Inc., BioLife Solutions Inc.

Companies operating in the cell cryopreservation market focus on developing cryopreservation medium solutions to better serve customers with advanced features. Cryopreservation medium solution refers to specialized formulations that preserve cells or tissues by freezing them at ultra-low temperatures, facilitating long-term storage and transportation while maintaining viability and functionality.

Segments:

1) By Product: Cell Freezing Media, Equipment, Consumables

2) By Application: Hepatocytes, Stem Cells, Oocytes And Embryotic cells, Sperm Cells, Other Applications

3) By End-Use Channel: Biopharmaceutical And Pharmaceutical Companies, Research Institutes, Biobanks, In Vitro Fertilization (IVF) Clinics, Other End-Use Channels

Geographical Insights: North America Leading The Market

North America was the largest region in the cell cryopreservation market in 2023. Asia-Pacific is expected to be the fastest-growing region in the forecast period. The regions covered in the cell cryopreservation market report are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East and Africa.

Cell Cryopreservation Market Definition

Cell cryopreservation is the process of preserving cells by cooling them to sub-zero temperatures, typically in liquid nitrogen at -196°C. This method halts all biological activity and metabolism, allowing cells to be stored for extended periods without degradation. Cryoprotective agents are used to prevent ice crystal formation, which can damage cell structures during freezing and thawing.

<u>Cell Cryopreservation Global Market Report 2024</u> from <u>The Business Research Company</u> covers the following information:

- Market size data for the forecast period: Historical and Future
- Market analysis by region: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.

• Market analysis by countries: Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

Trends, opportunities, strategies and so much more.

The Cell Cryopreservation Global Market Report 2024 by The Business Research Company is the most comprehensive report that provides insights on cell cryopreservation market size, cell cryopreservation market drivers and trends, cell cryopreservation market major players, cell cryopreservation competitors' revenues, cell cryopreservation market positioning, and cell cryopreservation market growth across geographies. The cell cryopreservation market report helps you gain in-depth insights into opportunities and strategies. Companies can leverage the data in the report and tap into segments with the highest growth potential.
