Exercise And Weight Loss Apps Global Market Report
2024 – Market Size, Trends, And Global Forecast
2024-2033

The rising prevalence of obesity is expected to propel the growth of the exercise and weight loss apps market going forward. Obesity is a medical condition characterized by an excessive accumulation of body fat, typically defined by a body mass index (BMI) of 30 or higher. The prevalence of obesity is rising due to a combination of sedentary lifestyles, poor dietary habits, and increased consumption of high-calorie, processed foods. Exercise and weight loss apps aid in managing obesity by providing guidance, tracking progress, and promoting adherence to physical activity and dietary goals.
