## Strong Future Growth Anticipated

The iliac stent market is projected to continue its strong growth, reaching \$1.34 billion in 2028 at a compound annual growth rate (CAGR) of 7%. The growth in the forecast period can be attributed to increasing prevalence of peripheral artery diseases, growing geriatric population, increasing angioplasty operations, rise in the need for less

intrusive operations, rising incidence of diabetes.

## Growth Driver Of The Iliac Stent Market

The increasing prevalence of peripheral artery diseases is expected to propel the growth of the iliac stent market going forward. Peripheral artery disease (PAD) is a circulatory condition characterized by the narrowing or blockage of arteries outside the heart and brain. The increasing prevalence of peripheral artery diseases is due to smoking, the aging population, hypertension, and diabetes. Iliac stenting is an effective treatment option for patients with PAD,
