Growth Driver Of The Urology Supplements Market

The increasing prevalence of urinary tract infections is expected to propel the growth of the urology supplements market going forward. Urinary tract infections (UTIs) affect any part of the urinary system, including the kidneys, ureters, bladder, and urethra. The prevalence of urinary tract infections (UTIs) is on the rise due to several contributing factors, including the aging population, increasing antibiotic resistance, the prevalence of chronic health conditions, and the occurrence of kidney stones. Urology supplements effectively maintain urinary tract health with

their capacity to prevent infections, reduce inflammation, support kidney and bladder function, enhance prostate health, regulate urine pH, and increase immunity.
