## Growth Driver Of The Surgery Tables Market

The increasing number of surgical procedures is expected to propel the growth of the surgery table market going forward. A surgical procedure involves an incision with instruments, typically performed in an operation theater and often requiring anesthesia and respiratory assistance.

The rise in surgical procedures is multifaceted, driven by technological advancements, the increasing burden of chronic diseases, improved access to healthcare, and attention to elective surgeries. A surgery table is required for surgical procedures to provide a stable, adjustable, and sterile surface that optimizes patient positioning and accessibility for the surgical team.
