

# Global Veterinary Renal Disease Market Size, Share And Growth Analysis For 2024-2033

*The Business Research Company has updated its global market reports with latest data for 2024 and projections up to 2033*

LONDON, GREATER LONDON , UK, July 31, 2024 /EINPresswire.com/ -- The veterinary renal disease market has experienced robust growth in recent years, expanding from \$14.55 billion in 2023 to \$15.33 billion in 2024 at a

compound annual growth rate (CAGR) of 6.8%. The growth in the historic period can be attributed to growing disease awareness initiatives, the shift in consumer preferences towards natural and organic pet food, increasing pet ownership rates globally, regulatory changes in veterinary pharmaceuticals, and growing awareness about pet health and nutrition.

animals, leading to impaired kidney function and potentially resulting in symptoms such as increased thirst, frequent urination, loss of appetite, and weight loss. The increasing veterinary renal disease is driven by longer pet lifespans, exposure to environmental toxins, dietary factors, and genetic predispositions. Veterinary renal disease treatments for pets typically involve dietary management, medication, and fluid therapy to alleviate symptoms, slow disease progression, and improve quality of life.
