Growth Driver Of The Subcutaneous Immunoglobulin (SCIG) Market

The increase in the prevalence of secondary immunodeficiency diseases is expected to propel

the growth of the subcutaneous immunoglobulin market going forward. Secondary immunodeficiency diseases are conditions with a reduced or compromised immune system caused by sources other than the immune system itself. The prevalence of secondary immunodeficiency diseases is driven by various factors such as aging populations, the use of immunosuppressive treatments, and environmental toxins. Subcutaneous immunoglobulin therapy provides antibodies to help strengthen the weakened immune system, especially in chronic disorders such as HIV or autoimmune diseases, thereby preventing infections and supporting immunological function during treatment.

Major Players And Market Trends

Key players in the subcutaneous immunoglobulin (SCIG) market include Pfizer Inc., Johnson & Johnson, Prothena Corporation plc, GlaxoSmithKline plc, Takeda Pharmaceutical Company Limited, Amgen Inc.

Major companies operating in the subcutaneous immunoglobulin market are developing subcutaneous human-klhw, a unique formulation containing human immune globulins (Ig) that strengthens the immune system. Subcutaneous human-klhw is used for subcutaneous administration, developed for treating primary immunodeficiency diseases in human body.

Segments:

- 1) By Product Type: Immunoglobulin A (IgA), Immunoglobulin G (IgG), Immunoglobulin M (IgM)
- 2) By Application: Primary Immunodeficiency Disorders, Autoimmune Diseases, Neurological Disorders, Other Applications
- 3) By End-Use: Clinics, Hospitals, Homecare, Other End-Uses

Geographical Insights: North America Leading The Market

North America was the largest region in the subcutaneous immunoglobulin market in 2023. Asia-Pacific is expected to be the fastest-growing region in the forecast period. The regions covered in the subcutaneous immunoglobulin (SCIG) market report are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East and Africa.

Subcutaneous Immunoglobulin (SCIG) Market Definition

Subcutaneous immunoglobulin (SCIG) refers to a method of administering immunoglobulin therapy in which the medication is delivered under the skin, rather than into a vein. This method allows for slower absorption of the medication, reducing the risk of side effects compared to intravenous administration. SCIG is used to treat various immune deficiencies, providing a convenient and effective way to boost the immune system.

[Subcutaneous Immunoglobulin \(SCIG\) Global Market Report](#) 2024 from The Business Research Company covers the following information:

- Market size data for the forecast period: Historical and Future
- Market analysis by region: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.
- Market analysis by countries: Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

Trends, opportunities, strategies and so much more.

The Subcutaneous Immunoglobulin (SCIG) Global Market Report 2024 by The Business Research Company is the most comprehensive report that provides insights on [subcutaneous immunoglobulin \(SCIG\) market size](#), subcutaneous immunoglobulin (SCIG) market drivers and trends, subcutaneous immunoglobulin (SCIG) market major players, subcutaneous immunoglobulin (SCIG) competitors' revenues, subcutaneous immunoglobulin (SCIG) market positioning, and subcutaneous immunoglobulin (SCIG) market growth across geographies. The subcutaneous immunoglobulin (SCIG) market report helps you gain in-depth insights into opportunities and strategies. Companies can leverage the data in the report and tap into segments with the highest growth potential.
