The rise in number of health-conscious consumers, increase in awareness of the benefits of energy bars, entry of new market players, and growth of digital marketing are the primary drivers of the market. Moreover, as more athletes and social media influencers continue to endorse energy bars, the global sale of energy bars is expected to rise steadily in the coming years. During the forecast

period, these factors are expected to propel the growth of the energy bar market.

Product launches, mergers & acquisitions, joint ventures, and geographical expansions are the

key strategies adopted by players in the market. The key players in the global energy bar market

industry include Brighter Foods Ltd, Cliff Bar & Company, General Mills Inc, Kind LLC, McKee Foods Corporation, NuGo Nutrition, Premier Nutrition Inc, Probar LLC, Quest Nutrition, and Kellogg Company.

An energy bar is a healthy snack bar made up of nutritional ingredients that are designed to increase energy and endurance. The main feature that sets it apart from other protein and snack bars is its high carbohydrate and sugar content, which contributes to its high energy value.

One of the key factors driving innovation in the food & beverages industry is the rapid evolution of consumer preferences. At present, the current energy bar market trends indicate that the demand for energy bars is expected to grow at an impressive rate in the coming years, owing to the steady rise in number of health-conscious people around the world as well as growing awareness about the benefits of energy bars.

Attributed to the fast-paced lifestyle, particularly in urban areas around the world, an increasing number of consumers are turning toward on-the-go products to meet their nutritional needs. As a result, energy bars have become increasingly popular in recent years.

Furthermore, over the last decade, a large number of players have gradually entered the global energy bar market, resulting in the availability of energy bars with a variety of flavors, sizes, and nutritional content through various distribution channels. Another factor that has contributed to the popularity of energy bars in recent years is digital boom as brands continue to promote their products through online sales channels such as social media, newsletters, and e-mail marketing. While the global energy bar market remains competitive, market players are expected to focus on packaging, pricing strategies, and marketing strategies to gain a competitive advantage in the current market landscape.

By type, the protein bar segment was the highest revenue contributor in 2020 attributed to the fact that to stay fit and healthy in daily lives, consumers are increasingly turning to weight management and energy products such as protein bars. By nature, the organic segment held the largest market share as the growing awareness of various health effects of artificial additives, such as color, flavor, sweeteners, and preservatives, has fueled the demand for an organic energy bar. Depending on the distribution channel, the specialty stores segment led the market, owing to the availability of a large variety of energy bar in these stores.

Manufacturers use smart labeling on their products to conceal the presence of high calorie or sugar levels by mentioning fortified or added functional ingredients/elements found in

confectionary bars. To eliminate the general perception of health risks associated with the consumption of confectionary bars, it is expected that manufacturers will work to incorporate functional ingredients/elements into their final offerings to gain consumers and increase their energy bar market share.

Restriction is also imposed by stiff competition from other types of energy bars. Other constraints include lack of flavor and high sugar content in many energy bars, which forces consumers to rethink energy bars as a healthy food product. Furthermore, fitness clubs' marketing campaigns promoting energy bars as a meal replacement have boomed energy bar sales.

The global demand for energy bars has been fueled by the prevalence of hectic consumer lifestyles that resulted in on-the-go food consumption. Furthermore, rising health concerns among consumers who prefer a balanced diet with nutrient-rich ingredients have boosted the product demand. The energy bar market UK is fueled by the continuous product innovation done in the category of conventional energy bars.
