

# Global Viral And Non-Viral Vector Manufacturing Market Size, Share And Growth Analysis For 2024-2033

*The Business Research Company's Viral And Non-Viral Vector Manufacturing Global Market Report 2024 – Market Size, Trends, And Global Forecast 2024-2033*

LANDON, GREATER LANDON, UK,  
August 1, 2024 /EINPresswire.com/ --  
The viral and non-viral vector manufacturing market has experienced robust growth in recent years, expanding from \$7.22 billion in 2023 to \$8.62 billion in 2024 at a compound annual growth rate (CAGR) of 19.5%. The growth in the historic period can be attributed to the rising prevalence of genetic disorders, advancements in biotechnology, increasing investments in gene therapy research, growing awareness of personalized medicine, and regulatory support for gene therapy development.

## Strong Future Growth Anticipated

The viral and non-viral vector manufacturing market is projected to continue its strong growth, reaching \$17.85 billion in 2028 at a compound annual growth rate (CAGR) of 20.0%. The growth in the forecast period can be attributed to rising demand for gene therapies, expanding applications in rare disease treatment, increasing investments in biomanufacturing infrastructure, and

growing adoption of precision medicine.

## Growth Driver Of The Viral And Non-Viral Vector Manufacturing Market

The increasing prevalence of genetic disorders is expected to propel the growth of the viral and

non-viral vector manufacturing markets going forward. Genetic disorders refer to a condition entirely or partially brought on by a deviation from the typical DNA sequence. Viral vectors deliver therapeutic genes to target cells, replacing or supplementing the defective genes that cause genetic disorders. Non-viral vectors are often used in ex vivo gene therapy approaches, where cells are genetically modified outside the body and then reinfused into the patient.

### Major Players And Market Trends

Key players in the viral and non-viral vector manufacturing market include Novartis AG, Thermo Fisher Scientific Inc., Merck KGaA, FUJIFILM Holdings Corporation, Regeneron Pharmaceuticals Inc.

Technological advancements are a key trend gaining popularity in the viral and non-viral vector manufacturing markets. Major companies operating in the viral and non-viral vector manufacturing markets are developing technologically advanced solutions to sustain their position in the market.

### Segments:

- 1) By Vector Type: Viral Vector, Non-Viral Vector
- 2) By Disease: Cancer, Genetic Disease, Infectious Disease, Cardiovascular Disease, Other Diseases
- 3) By Application: Gene Therapy, Vaccinology, Cell Therapy, Other Applications

### Geographical Insights: North America Leading The Market

North America was the largest region in the viral and non-viral vector manufacturing market in 2023. The regions covered in the viral and non-viral vector manufacturing market report are Asia-Pacific, Western Europe, Eastern Europe, North America, South America, Middle East, Africa

### Viral And Non-Viral Vector Manufacturing Market Definition

Viral and non-viral vector manufacturing refers to producing viral and non-viral vectors, tools that deliver genetic material into cells. Viral vectors treat human diseases and are used in anticancer and gene therapies. Non-viral vectors are utilized for a variety of gene therapy applications, particularly for the creation of vaccines and the treatment of cancer.

[Viral And Non-Viral Vector Manufacturing Global Market Report 2024](#) from The Business Research Company covers the following information:

- Market size data for the forecast period: Historical and Future
- Market analysis by region: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.
- Market analysis by countries: Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

Trends, opportunities, strategies and so much more.

[The Viral And Non-Viral Vector Manufacturing Global Market Report 2024](#) by The Business Research Company is the most comprehensive report that provides insights on viral and non-viral vector manufacturing market size, viral and non-viral vector manufacturing market drivers and trends, viral and non-viral vector manufacturing market major players, viral and non-viral vector manufacturing competitors' revenues, viral and non-viral vector manufacturing market positioning, and viral and non-viral vector manufacturing market growth across geographies. The viral and non-viral vector manufacturing market report helps you gain in-depth insights into opportunities and strategies. Companies can leverage the data in the report and tap into segments with the highest growth potential.
