## Strong Future Growth Anticipated

The bone cancer treatment market is projected to continue its strong growth, reaching \$1.59 billion in 2028 at a compound annual growth rate (CAGR) of 5.3%. The growth in the forecast period can be attributed to changes in healthcare policies, shift towards patient-centric care models, expansion of telemedicine and remote monitoring, increasing number of cancer patients,

unavailability of effective treatment and side effects.

## Growth Driver Of The Bone Cancer Treatment Market

The rise in the geriatric population is expected to propel the growth of the bone cancer treatment market going forward. The geriatric population is referred to as the elderly or senior population of individuals aged 65 years and older. Bone cancer treatment is provided for the geriatric population as it originates in the bone cells in the long bones, and its incidence tends to

increase with age and can be treated with advanced options to improve outcomes and address the specific needs of older adults.
