This prestigious accolade highlights the exceptional design and unique concept of the Xi'an Chanba Poly Grand Theater, positioning it as a new gateway for urban cultural exchange.

The A' Interior Space, Retail and Exhibition Design Award recognizes

designs that demonstrate innovation, functionality, and aesthetic appeal, aligning with current industry trends and standards. Renata Yin's award-winning design for the Xi'an Chanba Poly Grand Theater not only meets these criteria but also offers practical benefits for users, the industry, and other stakeholders, emphasizing utility and innovation in the realm of interior design.

Inspired by the concept of a "Brilliant Gem on the Banks of Chan River," the Grand Theater's design harmoniously melds with nature, appearing as a massive stone embedded in the Qinling Mountains. The public hall's design extends the building's flowing lines, engaging in a visual dialogue with the curtain wall and creating an animated visual conversation. The ingenious use of materials, such as GRG, artificial stone, metal grilles, aluminum panels, paint-free decorative panels, and sound-absorbing panels, creates a diverse texture and layering that seamlessly blends modernity and tradition, art and functionality.
