

Escalators Market Future Scenarios to Reach \$19,116.6 Million by 2030 | At a CAGR of 4.5%

Escalators Market Opportunity Analysis and Industry Forecast 2030

WILMINGTON, DELAWARE, UNITED STATES, August 2, 2024 /EINPresswire.com/ -- The rise in global population and rapid urbanization has significantly increased the demand for commercial buildings such as IT parks and shopping malls. This has propelled the demand for escalators, as they enable continuous vertical movement of people. Furthermore, rapid increase in population density in urban areas fuels the development of public transport systems, such as metros. The construction of new airports has also witnessed increase in the past few years. These factors further drive of [escalators market](#) growth.

The global escalators market size was valued at \$11.8 billion in 2020, and is projected to reach \$19.1 billion by 2030, registering a CAGR of 4.5% from 2020 to 2030.

Driving Demands:

By type the market is segmented into parallel, multi-parallel, walkway, crisscross and spiral. Among these, the parallel segment accounted for the highest market share in 2020 and it is expected to witness significant growth during the forecast period, owing to increase in demand from commercial buildings. The market is analyzed with respect to different applications in industrial verticals, such as commercial, public transit, institutional sector, and residential. The market is mainly driven by rise in demand for commercial space and increasing investments in public transport projects, such as metro rails and airports. However, factors such as requirement of frequent maintenance and high energy consumption of escalators have the potential to limit growth of the market.

In 2020, Asia-Pacific dominated the global escalators, in terms of revenue, accounting for around half the share of the escalators industry, followed by Europe and North America. Moreover, the market in Asia-Pacific region is growing with high CAGR, owing to rise in commercial real estate projects and metro rail projects across the globe.

Furthermore, on the basis of industry vertical, the others segment is anticipated to grow rapidly, with a CAGR of 6.3% during the forecast period, owing to rapid development of metro rails in

emerging economies.

For instance, according to India Brand Equity Foundation, India's metro rail network is expanding rapidly. As of November 2010, India has 637.2 km of metro rail in 13 cities and more than two dozen metro projects are in planning phase. Furthermore, the 1st phase of Pune Metro Rail would cover 31.25 km and consisting of 30 stations is built with a cost of US\$ 1.67 billion and is expected to become operational in 2022. In addition, modernization of existing railway station in India has also positively influenced the escalators market.
