

# Bay-Bay Water's Made-in-America Purified Distilled Water Available in Portable Size

*The Miami-based company introduces convenient, portable bottles of purified distilled water for babies, emphasizing Made-in-America quality and purity.*

MIAMI LAKES, FLORIDA, UNITED STATES, August 5, 2024

/EINPresswire.com/ -- [Bay-Bay Water](#), a trusted provider of purified distilled water for babies, announces the launch of its portable-sized bottles, offering parents a convenient and safe hydration solution for their little ones. This new offering underscores the company's commitment to providing high-quality, Made-in-America products that meet the unique needs of parents and their babies.

The new portable size makes it easier than ever for parents to access pure, safe drinking water for their infants while on the go. Each [BPA-free and phosphate-free bottle](#) contains 16.9 ounces of purified distilled water, ensuring that babies receive clean, contaminant-free water for formula preparation and hydration.

Mr. Osmay Gonzalez, Spokesperson for Bay-Bay Water, stated, "We are thrilled to introduce our purified distilled water in a portable size. We understand the challenges parents face when traveling with infants, and our new offering addresses this need head-on. Our water is free from contaminants that could potentially harm your baby's health, providing parents with peace of mind wherever they go."

Bay-Bay Water's purified distilled water undergoes a rigorous distillation process, removing most minerals and impurities. The company's commitment to quality is evident in every aspect of its production, from sourcing to packaging. The portable bottles are available in convenient 12 and 24-bottle packs, with the larger pack offering a lower per-bottle price for added value.

Key features of Bay-Bay Water's portable purified distilled water include:

1. Made in America: Ensuring strict quality control and supporting local production
2. Pure and safe: Free from contaminants that could harm baby's health
3. Convenient size: 16.9-ounce bottles perfect for on-the-go use
4. BPA-free and phosphate-free bottles: Ensuring additional safety for infants
5. Available in 12 and 24-bottle packs: Offering flexibility and value for parents

"At Bay-Bay Water, we're not just selling water; we're providing a pure solution for parents who want the best for their babies," added Osmay. "Our portable bottles are a game-changer for busy parents who need a reliable source of pure water for their infants, whether at home or on the move."

It's important to note that while Bay-Bay Water's distilled water is safe for babies to drink, it does not contain fluoride. Parents using this water for formula preparation should consult with their pediatrician about the need for fluoride supplements to support their baby's dental health.

To further demonstrate the quality of their product, Bay-Bay Water is planning to conduct a comprehensive study comparing their water to other options available for baby formula preparation. Results of this study will be made available on the company's website once completed.

Parents across the United States looking for the purest and safest water option for their babies can trust Bay-Bay Water. Bay-Bay Water's new portable bottles are available in convenient 12- and 24-packs at [Amazon](#) and Walmart (<https://www.walmart.com/ip/12-Pack-Bay-Bay-Purified-Distilled-Water-Babies-16-9-oz-No-BPA-Bottles-Use-Everyday-Drinking-Infant-Formula-Milk-Baby-Cereal-Phosphate-Fluoride-Preve/495797898>).
