Definition:
The strategic supervision and optimization of employees who handle essential administrative and support tasks for a business but don't deal directly with clients is known as backoffice workforce management. In addition, this involves tasks related to handling transaction processing, handling internal communications, controlling access to facts, and other guiding activities. Backoffice workforce management done right makes sure that those workers are appropriately staffed, trained, and prepared to do their jobs well. It involves workload balance, scheduling, monitoring overall performance, and enforcing generation solutions to optimize operations. Groups increase productivity, reduce operating costs, and ensure that front-line staff concentrate on their duties with clients by improving backoffice strategies. Furthermore, it is essential to maintaining the seamless operation of the entire company infrastructure.

By end users/application, the market is sub-segmented as: Banking, Financial Services, and Insurance (BFSI), Healthcare, Retail, Manufacturing, Telecommunications, Government, Education
