

Colorado RENU Loan Program Makes Home Energy Upgrades Affordable with Partnership with Solar Side Up

The Colorado RENU Loan program partners with Solar Side Up to make home energy upgrades more accessible and affordable for Colorado homeowners.

DENVER, COLORADO, UNITED STATES, August 9, 2024 /EINPresswire.com/ -- The Colorado Energy Office, in partnership with Colorado-based credit unions, announces an expanded

initiative under the [Colorado RENU Loan program](#) aimed at making home energy upgrades more accessible and affordable for homeowners statewide. Through a strategic collaboration with [Solar Side Up](#), a leading contractor specializing in renewable energy solutions, the program seeks to empower Colorado residents to adopt sustainable practices through cost-effective financing options.

The Colorado RENU Loan program offers low-cost, long-term financing designed to support a wide range of residential energy improvements. These include [solar panel installations](#), energy-efficient HVAC systems, insulation enhancements, and other upgrades that contribute to reducing energy consumption, lowering utility bills, and enhancing overall home comfort. By facilitating access to affordable financing, the program aims to incentivize homeowners to invest in renewable energy technologies that contribute to a cleaner and more sustainable environment.

"Solar Side Up is proud to partner with the Colorado RENU Loan program to bring innovative energy solutions to homeowners across the state," said Kirsten, Co-owner at Solar Side Up. "Our team is committed to delivering high-quality installations and personalized service that meet the unique energy needs of each homeowner. Through this partnership, we aim to make the transition to renewable energy seamless and cost-effective for Colorado residents."

The collaboration between the Colorado Energy Office and Solar Side Up underscores a shared commitment to advancing sustainability and reducing carbon footprints within local communities. Solar Side Up, known for its expertise and reliability in renewable energy
