

# Mad Science Brings World-Class STEM Programs to South and Central Orange County

*Offering Engaging and Interactive STEM Activities, Mad Science is Now Inspiring Young Minds in Orange County Through Exciting Programs and Events.*

IRVINE, CALIFORNIA, UNITED STATES, August 22, 2024 /EINPresswire.com/ -- [Mad Science](#), the renowned global STEM education program, is excited to announce its arrival in Orange County. For over 30 years, Mad Science has been delivering unique, hands-on science experiences to children through their after-school programs, [birthday parties](#), workshops, special events, Birthday parties and summer camps. Their innovative programs are as entertaining as they are educational, ensuring that learning science is a thrilling adventure for all students.

Mad Science South Orange County Classes

## Educational and Fun [STEM After-School Programs](#)

Mad Science's interactive after-school programs are designed to foster creative thinking and problem-solving skills. Covering a wide range of science topics, these programs provide children with the opportunity to experience science in a hands-on way. The experiments are safe, engaging, and kid-tested, conducted by well-trained science instructors. At the end of every class, students get to take home a different Mad Science educational science-themed toy. These toys are designed to demonstrate and build on the scientific concepts learned during the session, allowing students to continue their exploration of science at home.

## Spectacular STEM Assemblies and Special Events

Mad Science offers spectacular assemblies and special events that lift children's spirits and reignite their passion for learning. These large-scale presentations are designed to thrill

audiences of all ages, blending science learning with entertainment to enrich everyday life.

### Science Shows and Assemblies

Mad Science's science shows and assemblies are large-scale presentations that captivate audiences, both young and old. Their most popular show, "Fire & Ice," takes children on a journey through the world of extreme temperatures, featuring chemical reactions that make things disappear and reveal the secret properties of special gases. These types of shows can take place in schools, libraries, bring kids to workdays at any organization, community events or science fairs.

### Demonstrations and Make-and-Take Booths

Mad Science offers demonstrations and make-and-take booths where students and parents can engage in hands-on science activities. These booths provide the perfect opportunity to learn and create something new at every station, making science accessible and enjoyable for everyone, great for any science events at school, community events or bring kids to work days.

### Awesome Birthday and Holiday Parties!

Mad Science birthday and holiday parties offer children a unique and fun way to discover science. These celebrations include exciting demonstrations, such as bubbling chemical reactions and making slime or super bouncy balls. Parents can opt for extras like cotton candy, goody bags, or a spectacular rocket launch. Each party is an unforgettable experience that combines education with entertainment.

### Workshops

Complement your in-class science lessons with Mad Science's one-hour, curriculum-correlated, hands-on workshops. These workshops are ideal for single classes (up to 20 students) looking to delve deeper into specific topics and include a take-home project for each student.

Mad Science is committed to making science fun and accessible for children of all ages. With its wide range of programs, South Orange County families and schools can look forward to an exciting new resource for STEM education.
