Growth Driver Of The Soybean Processing Market

The increasing cases of diseases like obesity are expected to propel the growth of the soybean processing market going forward. Obesity refers to abnormal or excessive fat buildup that poses a risk to health; this is also called overweight. According to a study, soybean processing will aid in the prevention of obesity. In experimental models of obesity, soy protein has been demonstrated to prevent or decrease body fat formation and improve insulin resistance.

Consumption of black and yellow soybeans has been shown to reduce high-fat diet-induced obesity through modulating lipid metabolism.
