Growth Driver Of The Medicated Feed Additives Market

An increase in the rise in consumption of poultry products is expected to propel the growth of the medicated feed additives market going forward. The term poultry product refers to any poultry carcass or any product made entirely or partially from any poultry carcass, including those containing a very modest percentage of poultry ingredients. Medicated feed additives are

used to prevent and treat coccidiosis, a parasitic disease of the intestinal tract of animals caused by coccidian protozoa and necrotic enteritis, enteric disease of poultry. Hence, the rise in consumption of poultry products will increase the demand for medicated feed additives to keep the poultry healthy.
