Growth Driver Of The Sleep Apnea Devices Market

The increasing obesity rates are expected to propel the growth of the sleep apnea devices market in the coming years. Obesity is a medical disorder characterized by the buildup of extra body fat to the point where it threatens an individual's health and is frequently measured using the body mass index (BMI). Obesity is a major contributory factor for sleep apnea, and the global rise in obesity rates contributes to the disorder's increased prevalence. The need for equipment

that can successfully manage sleep apnea is increased by the association between obesity and illness.
