

# NNOXX Revolutionizes Athletic Performance with Launch of New Wearable Device Featuring Performance Readiness Score

*NNOXX Revolutionizes Athletic Performance with Launch of New Wearable Device Featuring Performance Readiness Score*

MANSON, WASHINGTON, UNITED STATES, August 13, 2024 /EINPresswire.com/ -- NNOXX, a

We developed the Performance Readiness Score to help athletes of all levels optimize their training and achieve their fitness goals more efficiently"

*Justin Saul*

leading innovator in wearable fitness technology, is proud to announce the launch of its latest cutting-edge product designed to transform the way athletes and fitness enthusiasts optimize their training routines. The NNOXX device is the first of its kind to include the groundbreaking Performance [Readiness Score](#), a feature that empowers users to make data-driven decisions about their workout schedules, ensuring they train when their bodies are at peak readiness.

## Optimizing Workouts with Performance Readiness Score

The Performance Readiness Score is a sophisticated metric that analyzes an athlete's physiological data to determine the optimal times for exercise. By monitoring key indicators such as cardiovascular fitness, muscle oxidative capacity, and recovery metrics, the NNOXX device provides a comprehensive assessment of an individual's readiness to perform at their best. This personalized insight allows athletes to tailor their workout intensity and timing, enhancing overall performance and reducing the risk of injury.

## Maximizing Results through Innovative Technology

Athletes often struggle to balance the demands of rigorous training schedules with the need for adequate recovery. The Performance Readiness Score addresses this challenge by offering real-time feedback on an athlete's physical state. By integrating this feature into their wearable device, NNOXX ensures that users can maximize the effectiveness of their workouts, making the most of their available time and effort.

"We developed the Performance Readiness Score to help athletes of all levels optimize their training and achieve their fitness goals more efficiently," said Justin Saul at NNOXX. "Our team is dedicated to continuous innovation, and this new capability reflects our commitment to

providing the most advanced, scientifically sound tools for performance enhancement. By understanding when their bodies are primed for activity, our users can train smarter, not just harder."

### Continual Innovation for Peak Performance

NNOXX is at the forefront of wearable fitness technology, consistently pushing the boundaries to offer state-of-the-art solutions for athletes. The new device not only features the Performance Readiness Score but also includes a range of other advanced functionalities such as GPS tracking, real-time performance analytics, and seamless integration with popular fitness apps. This comprehensive approach ensures that users have access to a holistic view of their fitness journey, empowering them to make informed decisions and achieve their goals.

### Empowering Athletes Worldwide

With the launch of this innovative product, NNOXX aims to revolutionize the fitness landscape by providing athletes with the tools they need to optimize their training. The Performance Readiness Score is particularly valuable for those who have limited time for exercise, enabling them to focus their efforts during periods of peak physical readiness and thus achieve better results in less time.

### About NNOXX

NNOXX is redefining health, fitness and performance with the first wearable active nitric oxide measurement device. Active nitric oxide levels are a key indicator of overall health and fitness. NNOXX combines unique biosensors and AI-powered personalized coaching to help aspiring and elite athletes boost active nitric oxide levels through exercise and meet their optimal health and fitness goals.
