FM, or frequency modulation, is one of the radio broadcasting systems that use frequencies between 87.5 MHz and 108 MHz. There are different categories of radio stations. The smallest service areas within three or four miles of the shipping unit; the largest serves areas more than 60 miles from the sending unit.

The FM Radios Market is expected to experience moderate growth in the coming years,

particularly in developing regions. However, in more developed markets, growth may be constrained by the increasing preference for digital audio platforms. The market's resilience will largely depend on the ability of manufacturers to innovate and integrate new features that appeal to modern consumers.

Recent Development:

- June 12, 2024 Salem Media Group, Inc. announced today that Salem News Channel has entered a partnership with HC2 Broadcasting.
- May 16, 2024 Cumulus Media announces that "KMJ: 100 Years in the Valley," a documentary film detailing the origins and century of success of iconic Fresno, CA, News/Talk station KMJ-AM/FM, has been nominated for a regional Emmy Award.

FM Radios Market Segmentation:

By Type:

- FM
- FM/AM
- Other

By Application:

- Commercial Use
- Home Use

By Region:

- North America
- Europe
- Asia Pacific
- Middle East & Africa
- Latin America
