Definition:

Virtual Hospital is a non-governmental organization that is part of Virtual Healthcare Limited. Telemedicine is used by Virtual Hospital to provide medical care to people in developing countries. Virtual Hospital collaborates directly with doctors and patients to ensure that the

benefits of modern medicine are accessible to all people and that the poor are not denied medical treatment due to a lack of funds or access to effective healthcare. One of the most significant advantages of a virtual hospital is that it can help connect patients in remote areas of the country with healthcare specialists. Some of them may have limited mobility, while others may not have enough money to travel long distances. Thus, telemedicine proves to be a cost-effective option for patients living in remote or rural areas.

#### Market Trends:

Rapid Advancement In Telehealth Services, It Emerge As A Game Changer In The Healthcare Industry

#### Market Drivers:

Rising Demand For Virtual Hospitals During Pandemic

#### Market Opportunities:

Development In Digital Therapeutics

Advancement In Synchronous Telemedicine And Asynchronous Telemedicine
