

New Remtec Video Addresses Electronics Onshoring Trend

A leader in ceramics-based electronics substrates, packages, and assemblies -- Canton, MA-based Remtec, Inc. has released a new video which speaks to onshoring.

CANTON, MA, UNITED STATES, August 15, 2024 /EINPresswire.com/ -- A leading supplier of ceramics-based electronics and microelectronic solutions for defense, aerospace, wireless, and high-power applications, Remtec, Incorporated has released a new corporate video that captures an important juncture in the company's journey. Chief among the topics covered in the video are:

Remtec employees make the difference!

- Remtec's unique position to help large OEMs and defense/aerospace prime contractors achieve goals related to onshoring their electronics supply base. This trend runs parallel to governmental efforts to strengthen the U.S. electronics ecosystem, such as the recently enacted [Chips & Science Act](#) and Protecting Circuit Boards and Substrates Act now making its way through the U.S. Congress.

“

American companies are quickly re-onshoring as much of the electronics ecosystem as possible for reasons that include national security, supply chain continuity, and U.S. competitiveness.”

*Brian Buyea, President -
Remtec*

- The company's newly renovated, \$12 million, 50,000 sq. ft. [ITAR-compliant facility](#) in Canton, MA.
- And Remtec's increased capabilities toolbox and physical capacity, which supports more comprehensive solutions than previously offered by the company. More specifically,

Remtec's recent investments in both infrastructure and talent are enabling the company to expand beyond its legacy offering of substrates -- and transition to being a provider of complex, custom packages, assemblies, multilayer circuits, and other high-integration, highly-dense

solutions demanded by today's OEMs.

"American companies are quickly re-onshoring as much of the electronics ecosystem as possible for reasons that include national security, supply chain continuity, and U.S. competitiveness," said Remtec president, Brian Buyea, at a recent ribbon cutting for its new facility. "Remtec is well-positioned to meet that returning demand and leverage this generational transformation."

Those interested in learning more about what is driving the onshoring trend and Remtec's answer to it are encouraged to visit the www.remtec.com

About Remtec

Operating out of Norwood, MA since its inception in 1990, [Remtec Incorporated](http://www.remtec.com) is an RoHS compliant, ISO 9001:2008 registered and ITAR compliant U.S. company providing custom and semi-custom ceramics-based electronic packaging, assembly, substrate, and component solutions for a wide range electronics customers – and applied in challenging contexts within RF/microwave, power electronics, optoelectronics, defense, aerospace, and semiconductor manufacturing segments.
