

Flower Turbines Opens Reservations for Upcoming Round

Flower Turbines Opens Reservations for New Equity Crowdfunding Round After Raising \$17 Million on Previous Rounds

LUBBOCK, TEXAS, UNITED STATES, August 15, 2024 /EINPresswire.com/ -- [Flower Turbines](#), an innovative renewable energy company, is now taking reservations for [equity crowdfunding](#) at <https://www.startengine.com/offering/flowerturbines>

This is called TTW (Test the Waters) Phase and allows potential investors to reserve shares before they are offered to the public. Investors who follow through on the reservation receive 10% bonus shares if they invest when the campaign goes live, likely in September 2024. There is no charge for not following through. TTW enables the company to budget in advance.

Flower Turbines plans to offer simultaneously for the first time equity crowdfunding for Canadians and accredited UK investors. Sign up for updates on this development at <https://www.flowerturbines.com/invest>

Bouquet of Wind Tulip Turbines

Large Size Flower Turbines at a Shipyard

One of the disruptive innovations in the Flower Turbines business plan is to change the market for small wind turbines from one at a time sales to large project sales. [Technology](#) being developed by Flower Turbines enables a new model in the small wind industry. Focused on creating beautiful, affordable, and efficient turbines for the urban/suburban market and tight

spaces, it seeks to pave the way for the future of distributed energy, particularly with solar. Its "Bouquet Effect" (whereby their turbines perform better when tightly packed together as opposed to the most common turbines which perform worse when tightly packed) could give them a key advantage to scaling farms of small wind turbines and harnessing the electricity they produce. As an example, 4 turbines correctly arranged perform as well as 8 turbines separately. This has a tremendous potential effect on the cost of wind energy in urban and suburban commercial and residential projects, or anywhere else where space is limited. The significance is like the difference between being able to put only one solar panel per roof versus many. And Flower Turbines does one better: its turbines make their neighbors perform better. This is an important scientific and business-model innovation.

The turbines are also beautiful, quiet, and bird friendly. They start at lower speeds than other turbines and endure higher speeds. Their 30+ patents are loaded with aerodynamic, engineering, and electronic advances.

Flower Turbines is a popular investment, having already received over \$16 million of investment in common stock through equity crowdfunding and angel investments. This is its sixth round. Two previous RegCF raises were sold out. Larger angel and institutional investors should contact support.us@flowerturbines.com

Wind and Solar E-bike Charging Poles

The Cluster Effect

Average Watts Per Small Wind Turbine at 10m/s

This shows how each turbine produces more energy as another turbine is clustered. 5 Flower Turbines together produce 228% more power than 5 separate turbines.

support.eu@flowerturbines.com and for the rest of the world at support.us@flowerturbines.com. Flower Turbines also has some regional distributors.

Flower Turbines is a US company with an important branch in the EU that has the goal of making small wind as powerful a force in renewable energy as solar by using its multiple patents to create a wind turbine that meets all the needs of urban and suburban environments. It combines aerodynamic innovations with beautiful design, low noise, and bird friendliness. Unlike other turbines, they make each other perform better when tightly packed together.

Flower Turbines at Rotterdam Roof Days

“We have the ambition to become a major global force in distributed energy,” said CEO Dr. Daniel Farb. “We believe we have the technology and enthusiasm to accomplish it. We are in the right industry at the right time. Incentives for an energy transition in most important areas of the world only add to our scaling up headwinds.”

Flower Turbines has external validation as a top company:

- Awarded the “Solar Impulse Efficient Solution” Label, a proof of high standards in profitability and sustainability to protect the environment. Here is a link to the page about Wind Tulips on the Solar Impulse website: <https://solarimpulse.com/efficient-solutions/wind-tulips#>
- A winner of Pepperdine Graziado Business School's annual Most Fundable Companies in America list. Flower Turbines was judged to be in the top 10 among 4500 startup companies examined.
- Winner of the Dutch government sustainability award for two separate years.
- A winner of the 2023 Yes San Francisco clean technology competition for top technologies to implement in San Francisco
- The CEO was chosen as a 2021 innovator by the US Department of Energy Impel+ program.
- Winner of many other awards
