

Global Omeprazole Market Overview And Statistic For 2024-2033

*The Business Research Company's
Omeprazole Global Market Report 2024 –
Market Size, Trends, And Global Forecast
2024-2033*

LONDON, GREATER LONDON, UK,
August 20, 2024 /EINPresswire.com/ --

The global [omeprazole market](#) has shown substantial growth recently. It is expected to increase from \$2.17 billion in 2023 to \$2.34 billion in 2024, reflecting a compound annual growth rate (CAGR) of 7.6%. This growth is attributed to several factors, including favorable reimbursement policies, the transition from H2 blockers to proton pump inhibitors, educational campaigns promoting omeprazole therapy, government investments in healthcare infrastructure, and health literacy initiatives.

Increased Incidence of Gastric Cancers Drives Market Expansion

The omeprazole market is forecasted to grow to \$3.15 billion by 2028, at a CAGR of 7.7%. This anticipated growth is driven by several factors, including government interventions affecting drug prices, disruptions in the pharmaceutical supply chain impacting omeprazole

availability, personalized treatment approaches, and rising consumer preference for self-care products. Additionally, changes in disease patterns, particularly the increased incidence of gastric cancers, are contributing to this growth. Gastric cancers, which originate in the stomach lining, are often managed with omeprazole, a proton pump inhibitor that reduces stomach acid production, alleviates symptoms, and supports ulcer healing. According to the American Cancer Society, gastrointestinal cancers in the US increased by 3.18% in January 2023, highlighting the growing need for effective treatments like omeprazole.
