Definition:

Trade insurance, also known as export credit insurance or trade credit insurance, serves as a financial safety net for companies that conduct both domestic and foreign business. Companies that experience financial collapse, insolvency, or political turmoil in the buyer's home kingdom are eligible for brilliant compensation. Put another way, the insurance company pays back a certain percentage of the outstanding debt if the policyholder is unable to pay their payments. In addition to fostering confidence in global trade and economic stability, this protection reduces the possibility of bad loans. Trade insurance helps companies reduce risk so they can increase customer base, get better terms on loans, and concentrate more calmly on their main operations.

Market Trends:

- N

Market Drivers:

- The growing global trade volume, the complexity of global supply chains, and trade finance options

Market Opportunities:

- The emergence of fintech solutions, big data analytics, and political risk insurance
