

Ultrahealth Technologies Warns Against Counterfeit and Low-Cost Hydrogen Water Bottles.

NEW YORK, NY, USA, August 19, 2024 /EINPresswire.com/ -- Ultrahealth Technologies, the owner on the Longevity Couture brand and producer of the UltraHy™ hydrogen water bottle, is issuing a strong warning to consumers about the dangers of both counterfeit and low-cost hydrogen water bottles flooding the market. Independent research has revealed that many of these products fail to provide the promised health benefits, often delivering insufficient hydrogen concentrations and using substandard materials that could pose significant health risks.

"Consumers need to be aware of the risks associated with counterfeit and cheaply made hydrogen water bottles," says Ivan Simetovic, CEO of Ultrahealth Technologies LLC. "These products not only underperform but could potentially harm your health. At Ultrahealth Technologies, we ensure that every UltraHy™ bottle meets the highest standards of safety, quality, and effectiveness."

UltraHy™ stands out due to its advanced SPE/PEM technology, providing up to 6210ppb of pure molecular hydrogen, which is designed to reduce oxidative stress, boost energy, and support overall health and longevity. Unlike inferior alternatives, UltraHy™ is built with premium materials and rigorously tested to guarantee maximum efficacy and safety.

Ultrahealth Technologies urges consumers to verify the authenticity of their UltraHy™ bottles by purchasing only from the official website or authorized sellers. Customers who suspect they may have purchased a counterfeit or low-quality product are encouraged to contact Ultrahealth Technologies' customer service team for assistance.
