

# Wooden Axis Large Roof by Yoshiaki Tanaka Wins Silver in A' Architecture Awards

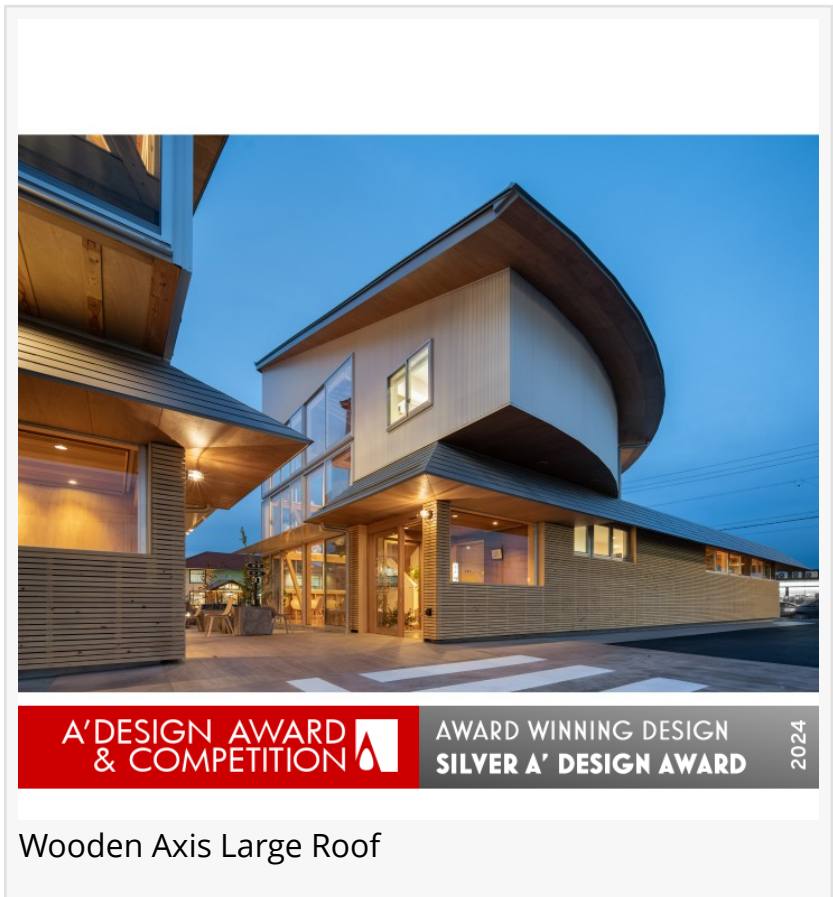

*Yoshiaki Tanaka's Innovative Clinic and Pharmacy Design Recognized for Excellence in A' Architecture, Building and Structure Design Category*

COMO, CO, ITALY, August 19, 2024 /EINPresswire.com/ -- The A' [Design Award](#), a highly respected and well-recognized award in the field of [architecture](#) design, has announced [Yoshiaki Tanaka](#) as a Silver Winner in the Architecture, Building and Structure Design category for the exceptional work titled Wooden Axis Large Roof. This prestigious recognition highlights the significance of Tanaka's innovative clinic and pharmacy design within the architecture industry.

Wooden Axis Large Roof showcases Tanaka's expertise in creating spaces that prioritize patient comfort and align with current trends in healthcare architecture. By incorporating the warmth of wood and a gentle, welcoming atmosphere, this design offers a refreshing alternative to commercialistic road service architecture, setting a new standard for regional medical centers.

The unique sunoko design code unifies the three buildings, creating a cohesive and visually striking architectural composition. Tanaka's thoughtful approach to material selection, structural integrity, and spatial harmony results in a functional and aesthetically appealing design that enhances the patient experience. The transparent wood structure, achieved through the strategic placement of exterior skin and openings, allows for ample natural light and a sense of connection to the surrounding environment.

Winning the Silver A' Design Award serves as a testament to Yoshiaki Tanaka's commitment to

Wooden Axis Large Roof

pushing the boundaries of architecture design. This recognition is expected to inspire future projects within the TSC Architects brand, fostering further innovation and exploration in the field of healthcare architecture. As a Silver winner, Wooden Axis Large Roof sets a new benchmark for clinic and pharmacy design, showcasing the potential for architecture to positively impact patient well-being and community health.

#### About Yoshiaki Tanaka

TSC Architects is a design office engaged in the design of housing and hospitals. TSC Architects' belief is that the designed building is responsible for its appearance as a factor in creating the townscape and creating a comfortable space for the people who use the building. To sustain this belief, TSC Architects values three things: the relationship between the building and light, the relationship between the building and greenery, and the selection of materials that fit the context of the building. In other words, TSC Architects creates architecture that considers the relationship between the boundaries of architecture and people's activities. TSC Architects is an architectural design office that creates "one & only" buildings with an accumulation of "meaningful design". Yoshiaki Tanaka is based in Japan.

#### About TSC Architects

TSC Architects believes that clinics should be comfortable architectural spaces that incorporate natural materials and allow patients to feel close to nature. By designing clinic architecture as a place where patients can experience healing, TSC Architects aims to dispel the traditional image of clinics as scary and painful places. TSC Architects is committed to designing hospitals that create a deep relationship between people and architecture, recognizing the importance of grasping the locality of the premises that make up the cityscape and making meaningful designs that stem from client dialogue. The goal is to create buildings that are beautiful, blend naturally into the surrounding environment, and become special places for people, ultimately fostering a better relationship between people and architecture.

#### About Silver A' Design Award

The Silver A' Design Award recognizes highly notable designs that exemplify excellence and innovation in the Architecture, Building and Structure Design category. Recipients are selected based on rigorous evaluation criteria, including innovative use of space, structural integrity, aesthetic appeal, environmental impact, functional efficiency, material selection, technological integration, social relevance, cultural sensitivity, economic viability, design originality, user comfort, energy efficiency, adaptability to change, use of natural light, spatial harmony, safety measures, accessibility considerations, resilience to weather, and integration with surroundings. The Silver A' Design Award acknowledges the exceptional expertise, talent, and insight of the designers behind these remarkable works, which contribute to raising industry standards and advancing the practice of architecture design.

## About A' Design Award

The A' Architecture, Building and Structure Design Award is a prestigious international design competition that recognizes superior products and projects in the architecture industry. Organized annually since 2008, the A' Design Award welcomes entries from star architects, engineering firms, leading construction companies, and influential brands worldwide. Through a blind peer-review process, a distinguished jury panel of design professionals, industry experts, journalists, and academics evaluates entries based on pre-established criteria. By participating in this esteemed award, entrants gain global recognition for their innovative designs and contribute to advancing the field of architecture. The ultimate aim of the A' Design Award is to promote the development of superior products and projects that positively impact society, driving the cycle of inspiration and advancement in pursuit of a better world through the power of good design.
