The chemical industry is known for its complexity, with patents often requiring detailed descriptions of intricate molecular structures, chemical compositions, and unique properties. Traditional patent drafting methods can be time-consuming and fraught with challenges, such as accurately capturing the nuances of chemical structures and ensuring comprehensive claim coverage. Recognizing these challenges, Po

Shaping tomorrow's IP landscape

Some say that generative AI has demonstrated its worth by freeing valuable time for IP professionals to focus on more strategic aspects of patenting. R&D teams are exploring the benefits too. But before we welcome generative AI with open arms, we must consider the new horizon of IP challenges emerging.

Join us at IAM Live: IP and Emerging Technology USA 2024 as we explore how you can avoid the dangers, get the most out of AI tools both for patent teams and engineers and future-proof your innovations.

This year IAM is bringing together industry-leading corporate executives, legal professionals, and technology investors to the heart of Silicon Valley. Expand your knowledge during a day of in-depth discussion. Take away the essential strategic and commercial insight needed to thrive in a world of greater connectivity, automation and the widespread deployment of artificial intelligence.

We look forward to seeing you in San Jose in October.
