Definition:

Gyrocopters, or autogyros, are a type of rotary-wing aircraft that combine elements of both an

airplane and a helicopter. Autogyros employ an unpowered rotor that spins freely in the airstream produced by forward motion, as contrast to helicopters, which use powered rotors to generate lift. When the aircraft is being propelled forward by a separate engine-driven propeller, this rotor provides lift. Autogyros are further distinguished by their ease of use, steadiness, and short takeoff and landing distances. They are renowned for their safety features, which include the ability to land safely and autonomously in the event of an engine failure.
