

Gavel's New Product for California Divorce, Probate, and Estate Planning Attorneys is Free to Use

Gavel launches free pre-built workflows for lawyers (no setup needed) to allow law firms to experience immediate profitability benefits of document automation.

LOS ANGELES, CALIFORNIA, UNITED STATES, August 21, 2024

/EINPresswire.com/ -- [Gavel](#), the leader in legal automation, announced the launch of its [Pre-Built Workflows](#), which are automated workflows for California

Divorce, Probate, and Estate Planning lawyers. These workflows require no setup to get started, and they are free for lawyers to test without signing up for Gavel.

“

Pre-Built Workflows give lawyers the flexibility to serve more clients and build long-lasting, future-proof, and profitable firms.”

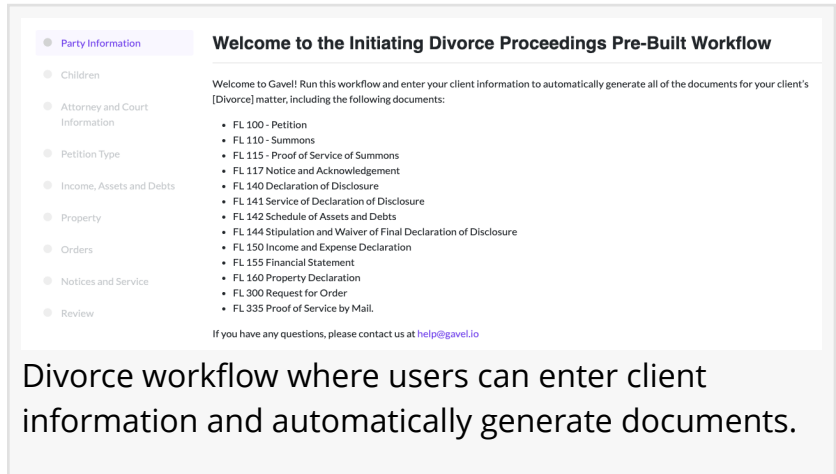

Dorna Moini

The company noted the imminence of adopting technology, particularly for small and mid-sized firms, who are often overlooked in technology surveys and reports, and expressed concerns for this contingent of lawyers and their current adoption.

Only one-third of lawyers surveyed by the ABA are using any document automation technology. This is the lowest hanging fruit for firms to not only improve their work

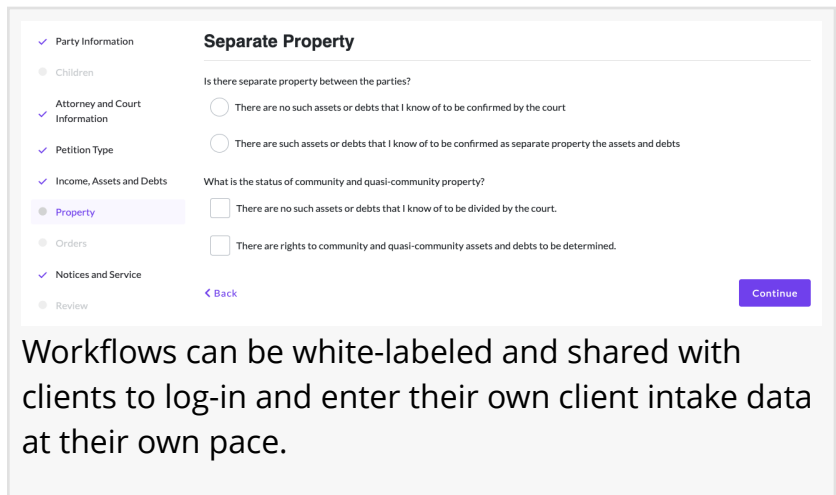

product and remain competitive, but also to drive higher profits and better margins, particularly as many areas get pushed to alternative fee arrangements.

Gavel's Pre-Built Workflows (no-setup, automated forms) are available for free for anyone to try out. In fact, an attorney in any of these areas could run the workflows as many times as they want. If users want to store information and fully integrate these workflows into their practice, they will need to start a Gavel account. This low-risk approach allows lawyers to experience the benefits of automation immediately.

The screenshot shows a software interface titled "Welcome to the Initiating Divorce Proceedings Pre-Built Workflow". On the left is a sidebar menu with categories: Party Information (selected), Children, Attorney and Court Information, Petition Type, Income, Assets and Debts, Property, Orders, Notices and Service, and Review. The main content area displays a list of legal forms to be generated: FL 100 - Petition, FL 110 - Summons, FL 115 - Proof of Service of Summons, FL 117 Notice and Acknowledgement, FL 140 Declaration of Disclosure, FL 141 Service of Declaration of Disclosure, FL 142 Schedule of Assets and Debts, FL 144 Stipulation and Waiver of Final Declaration of Disclosure, FL 150 Income and Expense Declaration, FL 155 Financial Statement, FL 160 Property Declaration, FL 300 Request for Order, and FL 335 Proof of Service by Mail. A footer note says "If you have any questions, please contact us at help@gavel.io". Below the screenshot, a text box states: "Divorce workflow where users can enter client information and automatically generate documents."

“Our vision at Gavel is to make access to the law universal,” said CEO Dorna Moini. “The biggest hurdle to making that vision come true is the speed at which legal knowledge can be automated into Gavel, giving lawyers the flexibility to serve more clients and build long-lasting, future-proof, and profitable firms. On the heels of our two AI product launches, Pre-Built Workflows add another strong pillar to our law firms’ operations.”

The screenshot shows a digital form interface for a legal workflow. On the left is a vertical sidebar with a list of steps: Party Information (checked), Children, Attorney and Court Information (checked), Petition Type (checked), Income, Assets and Debts (checked), Property (selected and highlighted in purple), Orders, Notices and Service (checked), and Review. The main content area is titled "Separate Property" and contains two sections of questions. The first section asks "Is there separate property between the parties?" with two radio button options: "There are no such assets or debts that I know of to be confirmed by the court" and "There are such assets or debts that I know of to be confirmed as separate property the assets and debts". The second section asks "What is the status of community and quasi-community property?" with two checkbox options: "There are no such assets or debts that I know of to be divided by the court." and "There are rights to community and quasi-community assets and debts to be determined." At the bottom of the form are a blue "< Back" button and a purple "Continue" button.

Workflows can be white-labeled and shared with clients to log-in and enter their own client intake data at their own pace.

This first launch specifically targets California Judicial Council forms, as well as a comprehensive suite of estate planning workflows. Gavel is working with experienced attorneys in other jurisdictions and practice areas to launch additional areas on a rolling basis.

About Gavel:

Gavel is the automation infrastructure that enables legal professionals to advance the way they serve and reach clients. An intuitive, customizable tool to automate any part of their law practice, Gavel gives attorneys and law firms the ability to streamline operations, save time, and serve more clients. Gavel is built by a dedicated team of lawyers and technologists committed to innovating on behalf of the legal profession. The company is led by a team of veteran lawyers, including CEO Dorna Moini, a former litigator at Sidley Austin, as well as technologists like CTO Pierre Martin with more than a decade of experience building AI and machine learning products at Microsoft and Amazon.
