

# TriumphHealth Supports Credentialing of LPC's and LMFT's as Medicare Expands Eligibility for Mental Health Providers

*TriumphHealth Facilitates Seamless Credentialing of LPCs and LMFTs in Medicare Advantage Plans, Enhancing Access to Mental Health Services for Medicare Patients*

SOUTHLAKE, TX, UNITED STATES, August 20, 2024 /EINPresswire.com/ -- TriumphHealth, a leader in healthcare consulting and revenue cycle management services, is expanding its support for healthcare providers with specialized credentialing services in response to recent Medicare regulation changes. As of January 1st, Licensed Professional Counselors (LPCs) and Licensed Marriage & Family Therapists (LMFTs) can now be credentialed with Medicare, allowing them to participate in Medicare Advantage Plans and integrate these plans with their existing commercial insurance offerings.

This development is a significant milestone for mental health professionals, enabling LPCs and LMFTs to provide care to a broader patient base, particularly those in the elderly and disabled populations covered by Medicare. This change underscores the growing importance of mental health services within the overall healthcare system and presents new opportunities for these providers.

TriumphHealth's [provider credentialing services](#) are designed to help LPCs and LMFTs navigate the complex and detailed credentialing process. This process includes verifying qualifications, such as education, licensure, and certifications, and ensuring that all necessary information is accurately submitted to Medicare and other payers. While the credentialing process can be complex and time-consuming, TriumphHealth's expertise helps reduce the risk of administrative errors that could lead to delays, ensuring a smoother transition for providers looking to expand their services to Medicare beneficiaries.

In addition to supporting LPCs and LMFTs, [TriumphHealth assists providers of all specialties and healthcare systems](#) nationwide with provider credentialing and payer enrollment for various insurance plans, including government, commercial and private payers. This includes everything from large medical practices to specialized providers, such as medical specialty providers, dentists, behavioral health professionals, ASC's, FQHC's, Labs, and durable medical equipment (DME) suppliers. TriumphHealth's comprehensive suite of services are designed to manage the intricate details of credentialing, helping healthcare practices and organizations across the country avoid the pitfalls that can lead to delays or denials in payer enrollment.

“Medicare’s inclusion of LPCs and LMFTs is a crucial step in expanding access to mental health care,” said a TriumphHealth representative. “TriumphHealth is dedicated not only to helping these mental health professionals integrate Medicare Advantage Plans into their practices but also to supporting healthcare providers and organizations of all types across the nation in meeting their credentialing needs.”

The expansion of Medicare Managed Care Plans, which now includes LPCs and LMFTs, has increased the demand for thorough and precise provider enrollment services. TriumphHealth’s approach to provider credentialing ensures that all providers meet the necessary standards required by both Medicare and commercial insurers. This is especially important as healthcare providers increasingly rely on accurate credentialing to avoid delays in payments and maintain compliance with ever-evolving regulations.

TriumphHealth’s commitment to supporting healthcare providers extends beyond just provider credentialing. The company offers a full suite of services designed to enhance the financial and operational success of healthcare practices. These services include [Revenue Cycle Management \(RCM\)](#), MIPS Consulting Services, and Practice Start-Up Services. By providing tailored solutions that address the unique needs of each healthcare provider, TriumphHealth continues to be a trusted partner in the healthcare industry, helping practices navigate the complexities of provider credentialing and payer enrollment, and beyond.
