## Growth Driver Of The Generic Injectables Market

The rising prevalence of cancer and cardiovascular diseases is expected to propel the growth of the generic injectable market going forward. Cardiovascular diseases refer to a group of disorders of the heart and blood vessels, and cancer is a disease in which some of the body's cells grow uncontrollably and spread to other parts of the body. Generic injectables are used in cancer and cardiac diseases to offer similar pharmaceutical equivalence or bioequivalence to brand drugs and enhanced drug availability and accessibility to provide more affordable

treatment.
