Definition

The Multiservice Provisioning Platform (MSPP) Market refers to the global industry focused on the development, deployment, and maintenance of multiservice provisioning platforms, which are network devices that integrate multiple types of communication services—such as voice, data, and video—over a single infrastructure. MSPPs are used by telecommunications companies and service providers to efficiently manage and deliver diverse services over optical and Ethernet networks. The market includes manufacturers of MSPP hardware, software developers, service providers, and network operators who use these platforms to enhance network flexibility, reduce operational costs, and meet the growing demand for high-speed, high-capacity communication services.
