

Antiglaucoma Drugs Global Market 2024 To Reach \$21.9 billion by 2028 At Rate Of 7.7%

The Business Research Company has updated its global market reports with latest data for 2024 and projections up to 2033

LONDON, GREATER LONDON , UK,
August 21, 2024 /EINPresswire.com/ --
The global antiglaucoma drugs market has seen significant growth in recent years, expanding from \$15.07 billion in

2023 to an expected \$16.27 billion in 2024 at a compound annual growth rate (CAGR) of 7.9%. This growth has been driven by factors such as an aging population, increased awareness of glaucoma, growing healthcare expenditure, and regulatory approvals. Looking forward, the market is expected to continue its strong upward trajectory, reaching \$21.9 billion by 2028,

Antiglaucoma Drugs Global Market Report 2024 –
Market Size, Trends, And Global Forecast 2024-2033

Increasing Prevalence of Myopia Drives Market Growth

The increasing prevalence of myopia is anticipated to propel the growth of the antiglaucoma drugs market going forward. Myopia is a refractive eye condition in which a person can see nearby objects clearly but has difficulty focusing on distant objects. Antiglaucoma drugs are the most effective therapy for myopia progression and refractive regression in patients, minimizing the risk of ophthalmic operations. For instance, according to NVISION Eye Centers, 34 million people in the US had myopia in 2022. Additionally, the Brien Holden Vision Institute reports that by 2050, half of the global population will have myopia, with 5 billion people at risk of preventable vision loss. The increasing prevalence of myopia is expected to drive significant growth in the antiglaucoma drugs market.
