

Anemia And Other Blood Disorder Drugs Market Segments, Drivers and Restraints and Trends For 2024 - 2033

The Business Research Company has updated all its market reports with the latest information for the year 2024, projecting trends and forecasts until 2033

LONDON, GREATER LONDON, UK,
August 21, 2024 /EINPresswire.com/ --

The [global anemia and other blood disorder drugs market](#) has witnessed strong growth in recent years, expanding from \$11.13 billion in 2023

to \$11.91 billion in 2024, at a compound annual growth rate (CAGR) of 7.0%. This growth can be attributed to factors such as disease prevalence, global health initiatives, an aging population, pharmaceutical innovation, and increased patient awareness. Looking ahead, the market is expected to continue its upward trajectory, reaching \$15.49 billion by 2028 at a CAGR of 6.8%, driven by emerging markets, global demographics, and economic factors.

Rising Anemia Prevalence Fuels Market Growth
The increasing prevalence of anemia among the global population is a significant driving factor for the anemia and blood disorder drugs market. Unhealthy lifestyles, changing dietary habits, and elevated stress levels have

contributed to a surge in anemia cases worldwide. Notably, anemia is particularly prevalent among the elderly population, with a prevalence rate of around 17% among individuals over 65 years old. Additionally, the World Bank has identified anemia as the 8th leading cause of disease among women and young people. This growing prevalence is fueling the demand for effective treatments, thereby driving market growth.
