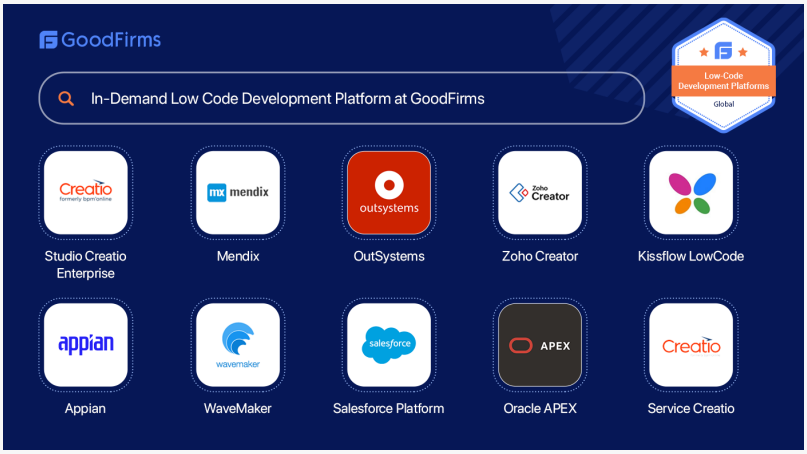
AI-backed Low-Code Development Platforms for Rapid Development and Innovation

Low-code development software assists various businesses to develop and deploy lightweight applications faster in a single workflow.



Low-CodeDevelopmentPlatforms

WASHINGTON, UNITED STATES, August 22, 2024 /EINPresswire.com/ -- --AI -backed Low-code development platforms are creating a buzz in the business world helping various organizations to build intelligent business applications quickly with just few drag and drop features without any extensive coding training or skills.

Recent studies reportedly indicate that the number of low-code technology users will nearly triple by 2025. The use of low-code tools improved from the COVID-19 pandemic days due to the increasing pressure on the IT sector for providing faster development services with high quality applications. Being a citizen development approach, the low-code development platforms allow construction of lightweight applications using visual point and click options. With AI, the process has even become more intelligent.

> With minimal downside, the low-code development tools not just make it easier to develop applications, but also reduces cost, complexity, and eliminates the need for multi-stack developers."
>
> *GoodFirms*

"Low-code development platforms are fast transforming software development by bridging the tech gap, speeding up the development process, eliminating the need for coders, and delivering industry-specific applications quickly. To top this, AI is a game changer," says GoodFirms.

Service seekers can also check app development software and game development software by utilizing the filter options for features, pricing models, devices supported, deployment, business size, etc. Furthermore, they can also verify the most reviewed, top-rated tools and select a

suitable system.

Popular Features of low-code development platform Includes:

--AI-Assisted Development
--Business Process Automation
--Collaborative Development
--Data Aggregation & Publishing
--Deployment Management
--Drag & Drop
--Integrations Management
--Iteration Management
--Performance Monitoring
--Requirements Management
--Templates
