How IRAEmpire Used Sentiment Analysis to Analyze Endeavor Metals Group Reviews:

Ryan highlights, "We used data science, artificial intelligence as well as our own experience to create this analysis of Endeavor Metals Group reviews."

What is Sentiment Analysis?

Sentiment analysis is a way to find out if a piece of writing expresses positive feelings, negative feelings, or neither. It helps researchers understand the emotions or opinions that people are sharing in text.

## How It Works

### 1. Finding the Sentiment:

- Positive: Words or phrases that show happiness, approval, or satisfaction.
- Negative: Words or phrases that show sadness, disapproval, or dissatisfaction.
- Neutral: Words or phrases that are neutral, not showing any strong emotion.

### 2. How IRAEmpire Did It:

- Using Word Lists: Ryan says, "We use lists of words that are labeled as positive or negative. For example, "good" might be on the positive list, and "bad" might be on the negative list."
- Using Computer Models: Also, companies teach computers to recognize positive and negative words and phrases by showing them many examples.

## Why It's Useful

### 1. Customer Reviews:

- Companies can look at reviews to see if people like or dislike their products.

### 2. Social Media:

- Businesses and celebrities can see what people are saying about them online.

### 3. Market Research:

- Companies can understand what people think about their products or services.

### 4. Politics:

- Politicians can see how the public feels about their actions or policies.

## Challenges

### 1. Sarcasm and Jokes:

- It's hard for computers to understand sarcasm or jokes because the words might say one thing but mean another.

### 2. Context Matters:

- Sometimes the meaning of words changes depending on how they are used, and this can confuse the analysis.

### 3. Different Ways of Speaking:

- People use slang or different ways of speaking, which can be tricky for computers to understand.

## Examples

- Positive Review: "I love this phone! It has a great camera and long battery life."
- Sentiment: Positive
- Negative Review: "This laptop is too slow and crashes all the time."
- Sentiment: Negative
- Neutral Statement: "The package arrived yesterday."
- Sentiment: Neutral

According to Ryan Paulson, "Sentiment analysis helps us figure out if people are happy, unhappy, or neutral based on what they write. It's useful for businesses, politicians, and anyone who wants to understand public opinion better."
