Cybersecurity Book Launch by Dasha Davies and Stealth-ISS Group Inc.

Stealth-ISS Group Inc., announces the release of "CYBERSECURITY: IT'S NOT ALL ABOUT TECHNOLOGY," authored by the company's President and CISO, Dasha Davies.

TAMPA, FL, USA, September 4, 2024 /EINPresswire.com/ -- Stealth-ISS Group Inc., a leading name in cybersecurity services, proudly announces the release of "CYBERSECURITY: IT'S NOT ALL ABOUT TECHNOLOGY," authored by the

Stealth-ISS Group Inc

company's President and CISO, Dasha Davies. This groundbreaking book aims to redefine the cybersecurity landscape for business leaders worldwide and serves as a how-to guide to navigate the unknown of AI, GRC, and cybersecurity from a business strategy perspective.

> " Business leaders assume that security technologies will make them secure and I want to show them how important GRC and AI is and also how to leverage those tools to grow and minimize risks."
>
> *Dasha Davies*

In a world driven by digital transformations, "CYBERSECURITY—IT'S NOT ALL ABOUT TECHNOLOGY" emerges as a critical guide for top executives and decision-makers. The book explores Governance, Risk, and Compliance (GRC), emphasizing its importance in creating a secure business environment. Through its pages, Dasha Davies emphasizes that effective cybersecurity extends beyond technology and requires implementation of government, risk, and compliance to not only become secure and compliant but also increase customer confidence, revenue, and efficiency in business operations

With the growing use of artificial intelligence (AI) in business, the book also addresses the hidden risks associated with AI technologies. Readers will find valuable, practical advice on managing these complexities. The book furnishes a plethora of "how-to" strategies aimed at mitigating risks, framed within questions leaders should pose to their IT teams or Managed Service
Providers (MSP) teams.

The primary goal of "CYBERSECURITY—IT'S NOT ALL ABOUT TECHNOLOGY" is to empower business owners to use AI, cybersecurity, and GRC to enhance business growth and build customer trust. "This launch is not just about promoting a book—it's about championing a movement toward informed, secure, and prosperous business operations in the digital age. I see it daily when business leaders assume that security technology such as firewalls, endpoint security, MFA, vulnerability scanning, and everything in the cloud will make them secure. With this book, I want to show that there is more to it that they need to consider and how to leverage that to grow their revenue," said Dasha Davies.

Dasha Davies, a cybersecurity and US Navy veteran and respected voice in cybersecurity and AI, previously authored the acclaimed book "BEYOND BINARY: AI AND CYBERSECURITY." Her extensive knowledge and experience are evident as she explains the multifaceted risks associated with AI in business, how it impacts our daily lives, and areas to consider when creating and using AI from an ethical and biased perspective.

"As a business owner myself, I understand the desire to protect and grow your business. While you are focusing on growth, service, and product delivery, managing your staff, and ensuring your IT is operational, this book will show you how to leverage security, GRC, and AI to your benefit to grow, increase customer trust and confidence, and set yourself apart from the competition. It is an-How-to-Guide with check lists, processes, templates and much more. I wanted to provide the business owners and CISOs an actionable roadmap", said Dasha Davies, President/CISO when asked about the reason for publishing this book.

Its not all about technology

Its not all about technology Book - Dasha Davies
