Growing Demand for Bladder Cancer Drugs

The rising number of bladder cancer cases is a significant driver for the bladder cancer drugs market. Contributing factors include unhygienic workplace exposures, increased smoking habits, and consumption of arsenic-contaminated water. According to the American Cancer Society, there were an estimated 82,290 new cases of bladder cancer in the United States in 2023, with approximately 62,420 cases in men and 19,870 in women. This surge in cases is propelling the demand for bladder cancer drugs and thus fueling market growth.
